

MICRO 18 CLASS

IMCCA MEETING 2018

REPORT OF THE CHIEF MEASURER 2018

1. State of the class rules development

The project, formatting of the current Class Rules in the standard class rule format, is finished.

Thanks to all TC members, special to Vasiliy and Philippe and the EC.

In the moment, in lack of an IMCCA **Chief Executive Officer**, who normally is responsible to work together with the World Sailing technical specialist Hendrik Plate, I took this job over from.

I suggest for the future, that IMCCA nominates a further person as Chief Executive Officer, because it is a lot of work.

Since January 18, 2018, I am in contact with Hendrik Plate with the aim to optimise our class rule wording to be accepted by World Sailing and not in conflict with ERS and other World Sailing Rules.

2. Projects

• New project in Serbia

The National Micro Class Serbia generated a new project.
Goran told me: We are working on a new design of the boat, that we plan to produce in a serial production.
I proved this design on the compatibility to our class rules. It fits.

- **First EURO MICRO in Italia.**

The Micro Class Italia started the first Euro Micro in Italia.

17 Micro´s were on the competitor list .

I went to Italia to support the Micro Class:

- Organice a short „training on the job“ seminar.
- Take part on the races as competitor.
- Serve all questions about measurement and old serial micro´s.

- **Italian Micro Class get the second National Measurer:**

Gianni Filippini

Tel. +39 328 7447 683

3. World Championship 2017 Measurement in Frankreich, Annecy

- Organisation:

There was a good organisation between the chief measurer and the organiser.

All requested measurement stations, material or personal was on place.

Additional a national measurer from the French Sailing Association and the new French Micro Class Measurer Philippe Bonnemains.

The volunteers was very motivated.

Equipment control was, like the event in Brest before, optimised, so that the most competitors need about 2 Ours.

My vision and plans of the equipment control were full realised. :-)

4 Certification / Upgrades / Transliteration

- Philippe Bonnemains got a

CERTIFICATE IMCCA MEASUREMENT TRAINING

during the Word Championship , take place in Annecy 2017, as assistant of the chief measurer.
